

Build Your Foundation as a Full-Stack Developer

Next Batch Starts: [Insert Date]
Application Cut-off: [Insert Date]
Seats Available: 40 Only

Executive Diploma in Front-End & Back-End Web Technologies

Integrated Front-End & Back-End Curriculum

Hands-On Projects with GitHub Portfolio

Practical Training via Web Sim Labs

Job-Ready Skills in Full-Stack Development

Industry-Aligned Diploma with NASSCOM Standards

A 6-month, career-focused diploma designed to equip learners with the essential front-end and back-end skills required to thrive as a full-stack developer. Delivered through live instructor-led training and virtual simulation labs, the program emphasizes practical project-building, Git-based version control, and deployment skills—ensuring participants are job-ready from day one.

The demand for full stack developers continues to grow, with organizations seeking professionals who can design, build, and deploy complete applications. This diploma is structured to deliver practical readiness, blending foundational coding with hands-on projects and real-time simulation labs.

Program Overview

- Total Duration: 6 Months (110 Days | 24 Weeks)
- Credits: 10 Academic Credits
- Live ILT Hours: 60 Hours
- Self-Paced Learning: 40 Hours
- Hands-on Projects: 10+ Practical Assignments + Capstone
- Mode of Delivery: 100% Online Instructor-Led
- Medium of Instruction: English
- Program Fee: ₹ 1,10,000
- Batch Size: 40 Participants
- Eligibility: 10+2+3 with programming knowledge
- Industry Alignment: NASSCOM & IT Standards
- Rating: ★ 4.5 / 5

Course Highlights:

- Integrated front-end & back-end curriculum in one diploma
- Strong emphasis on real-world project development
- GitHub-based version control and portfolio building
- Access to Web Sim Labs & debugging tools
- Career-focused—designed for freshers and career transitioners

Why Professionals Choose This Program

- Learn HTML5, CSS3, JavaScript, Node.js, MySQL & MongoDB in one integrated pathway.
- Develop strong debugging and deployment skills using industry tools.
- Build a GitHub-backed project portfolio for recruiter visibility.
- Globally recognized Executive Diploma certification.

Duration & Projects

- 6 Months | 100+ Learning Hours
- 10+ Hands-on Projects across modules
- Capstone Project: Build and deploy a full-scale web application

**Transforming
Learners
into Leaders**

What You Will Learn – Skills & Tools

Core Skills:

- HTML5, CSS3, Responsive Web Design
- JavaScript programming & DOM manipulation
- Git & GitHub version control
- Backend programming with Node.js
- RESTful APIs & database integration (MySQL, MongoDB)
- Web application deployment & debugging

Key Tools & Platforms:

- VS Code, Git, GitHub
- Postman for API testing
- Chrome DevTools for debugging
- Local & cloud-based simulation labs

Course Curriculum

Module 1: Web Development Basics – HTML5 & CSS3

Module 2: JavaScript & DOM Manipulation

Module 3: Git & GitHub for Developers

Module 4: Backend Fundamentals with Node.js

Module 5: REST APIs & Databases (MySQL + MongoDB)

Module 6: Capstone Project – Build & Deploy a Full Web Application

**Transforming
Learners
into Leaders**

Career Outcomes

Roles You Can Apply For:

- Front-End Developer
- Backend Developer
- Junior Full Stack Developer
- Web Application Developer
- UI Developer

Salary Outlook:

- Entry-Level: ₹3.5 – ₹5.5 LPA
- Post-Experience (1–2 years): ₹6 – ₹8 LPA

What Our Learners Say

"I had zero experience with coding, but this course made it easy and practical. The simulation labs were amazing!"

– Ayesha Rizvi, Web Intern at EdTech Co.

"What sets this course apart is its mentorship and practical focus. We were not just taught theory—we coded and deployed real projects."

– Sunil Joshi, Front-End Developer at DigitalX
